**CIVIL GENERAL NOTES**

1. All work shall be done in accordance with the U.S. Corps of Engineers and all other applicable government rules and regulations. The Plan(s) and specifications, including all Addenda, are intended to be used as a guide and shall not be construed as an agreement or contract. **The Construction Specifications shall govern.**

2. The location of all existing underground utility facilities are approximate only. May not be accurate in all places. Undocumented facilities may exist on site. **All utility facilities are to be verified by the Contractor prior to any proposed excavation.**

3. **All contractors shall be responsible for any damage caused by excavation or work performed hereunder.**

4. **Contractor shall call the utility notification center of Colorado for existing public utility locations (9-1-1) 72 hours prior to digging.**

5. **Contractor shall provide a review of all equipment and materials that will be used on the project.**

6. **All designs resulting from construction operations shall be made in the field and approved by the Owner.**

7. No additions or changes to the plans and specifications shall be made without written permission of the Owner and/or Architect/Engineer.

8. All damages and injuries to any person or property caused by workmen or workmen’s equipment are the responsibility of the Contractor.

---

**Know what’s going on before you dig. Dig with care.**

Call 2-business days in advance before you dig, grade or excavate.

These Plans Have Been Revised to Conform to Construction Records. Revision Date: 4/8/11

Call Before You Dig

Call 2-business days in advance before you dig, grade or excavate.
5. The stabilized staging area shall consist of a minimum of 3" of granular material (gravel).

3. If required by the local jurisdiction, site access roads shall be stabilized in the same manner as the stabilized staging area with approval from local jurisdiction.

2. Stabilized staging area shall be large enough to fully contain parking, storage, and unloading and stabilized staging area shall be removed at the end of construction. The granular material shall be removed or, if approved by the local jurisdiction, used on site, and the area topsoiled, drilled seeded and underlying subgrade becomes exposed.

4. Any accumulated dirt or mud shall be removed from the surface of the stabilized staging area.

3. Stabilized staging area shall be enlarged if necessary to contain parking, storage, and unloading and after any storm event. The SWMP manager shall make repairs or clean out upstream sediment as necessary to maintain effective working operation and to maintain capacity for wasted concrete.

2. SWMP manager shall provide additional thickness of granular material if any rutting occurs or to stabilize otherwise or stabilize with approval from local jurisdiction.

1. The SWMP manager shall inspect the stabilized staging area every 7 calendar days, and also during and after any storm event.

NOTE: Erosion control measures, typical compacted embankment material, turf, or otherwise stabilized with compacted embankment material, shall be maintained until landscaping is completed, or as directed by local jurisdiction or as required to stabilize otherwise or stabilize with approval from local jurisdiction.
