DESTRUCTION NOTES

1. Pea gravel shall be removed from the existing play equipment area and stockpiled for use in the new Boulder Field. Pea gravel shall be clean and free from debris. Contaminated pea gravel may be
laid into the field prior to earthwork.

2. Grassseeds may be laid into soil if necessary are not present.

3. Pea gravel on existing field may be laid into the soil, used under play sites, and/or under crusher
line track.
PLANTING NOTES

1. THE OVERALL PLANTING PLAN THEME FOR BARNEY FORD IS NATIVE AND NATURAL.

2. ALL PLANTS WERE CHOSEN FOR THEIR AVAILABILITY AND GROWTH IN COLORADO.

3. MOST WILL NOT NEED WATER ONCE ESTABLISHED.

4. THE TREES CHOSEN ARE NON-NATIVE AS TYPICAL NATIVE TREES ARE NOT ALLOWED BY D.P.S.

5. THE SHADY AREAS ARE BOULDER FIELD PLANTINGS AND THE EXPERIMENTAL LANDSCAPE BOTH ARE ENLARGED FOR DETAILS AND THEMES.
BOULDER FIELD NOTES:

The Boulder Field is one of the main play areas proposed for Barney Ford Elementary.

The theme of mountains is expressed consistently throughout the site and is reinforced by the plantings and the details.

This is an area that is appropriate for all ages of play. It incorporates many aspects of play including:

Social skills:
- Cognitive learning skills
- Physical and motor skills
- Fine and motor skills
- Selection and decision making skills

BOULDER FIELD ENLARGEMENT

DESIGN TEAM:

TAYLOR, IVY

DUNLAP, KERRY
1. KEY HOLE ON LONGS PEAK
   SCALE: NOT TO SCALE

2. MODEL OF SHADE STRUCTURE
   SCALE: NOT TO SCALE

3. SHADE STRUCTURE — FALCON SCHOOL MASCOT
   SCALE: 1/8"=1'-0"

4. SECTION FORD FALCON
   SCALE: 1/4"=1'-0"

NOTES:

The shade structure broadly embraces the site as the school mascot.

The shade structure is to be manufactured by Western Steel and Stahl — contact Todd Scott; I will provide specifics details of manufacturing at a later date, as Todd and I have not been able to meet for an appointment.

The key hole is the entry into glacier valley which leads to the shade structure.

There are a few boulders embedded into the concrete.

The area has 4 shade trees, 2 ornamental trees, 2 gazebo tables, and a table under the shade structure.

A large compass is to be embedded into the concrete, under the shade structure.

SANDBLAST CONCRETE DETAIL — ENLARGEMENT
SCALE: 1/4"=1'-0"
OUTDOOR CLASSROOM NOTES:

1. The theme for the outdoor classroom is a geologic time walk; the start of the walk is present day. As you walk towards the outdoor classroom, you descend into time.

2. The pathways will be 4" concrete; time details as well as foot prints will be consolidated in.

3. Plantings in this area are to be experienced: rhythmic, colorful, textural, and plants to fill the areas.

4. The outdoor classroom is surrounded by shade trees to the South, and ornamental trees on the north side.

5. Grasses along the west side of the garden, just as you run along the track.
