The design of the Remington Elementary school playground was a three semester project involving research, design development and a design build experience. The first phase was the development of a masterplan for approval by Denver Public Schools.

The second phase was creating a set of design development drawings and working with a landscape architect. In the final stage I participated in a design-build renovation of Remington’s playground as well as other Denver elementary school playgrounds.

The playground was completed in the fall of 2002 (the shade structure is currently under construction). The design celebrates the school playground as a dynamic cultural cross-roads between latin and anglo culture. The design intent was to create an urban space that was safe and enjoyable for children and adults in the surrounding community.
Remington Elementary School Playground

LEGEND

- Four Square
- Hopscotch
- Tetherball
- Boulders
- Access Ramp
- Gateway / Entrance
- Basketball Backstop
- Track and Field
- Soccer Area
- Fitness Area
- Reserved Area
-雕塑
- Gateway
- Multi-Purpose Grass Area
