Vision
To provide the children of Southmoor and the surrounding community with an environment that engages the mind and encourages exploration while presenting a variety of recreational opportunities.

Purpose
To create a school environment that is both educationally stimulating and aesthetically pleasing, fostering a sense of community and promoting healthy lifestyles.

Site Description
The site is located in a suburban area with a mix of natural and developed environments. The site includes a variety of plant species and a natural stream that runs through it. The current layout of the playgrounds is scattered and lacks a cohesive design.

Program
- 4000 square feet of play area
- Cycling path
- Trees
- Shade structure
- Shade tree
- Central play area
- Picnic area
- Shade structure
- Shade tree

Organizational Systems
- Agricultural terraces
- Braided stream channel

Special Relationships
- View of the site
- View of the campus

Conclusion
The design aims to create a vibrant learning environment that respects the natural beauty of the site while providing a safe and engaging space for students.
