CITY AND COUNTY OF DENVER, STATE OF COLORADO.

PROJECT LOCATION

VICINITY MAP
3. Valley Inlet Protection

Definition: A sediment filter or an expanded impounding area around a storm sewer drop inlet or weak slope

Purpose: To reduce sediment from entering storm drainage systems prior to permanent stabilization of disturbed area.

Special Application: This method of inlet protection is applicable when heavy sediment-laden flows are expected, but not when sediment is the primary concern. Initial erosion or drainage in adjacent areas may require additional protection.

Note: Alternate design could utilize gravel filter bags.

4. Curb Inlet Protection

Definition: A sediment filter or an expanded impounding area around a curb drop-inlet or weak slope

Purpose: To reduce sediment from entering storm drainage systems prior to permanent stabilization of disturbed area.

Special Application: This method of inlet protection is applicable in curb inlets where sediment is the primary concern. Initial erosion or drainage in adjacent areas may require additional protection.

Note: Alternate design could utilize gravel filter bags.
